

Shared Vision for Health Care in Texas Project

RAISE Health Care in Texas

What are the elements this shared vision must contain?

RAISE

Regional solutions.

Access for all.

Incentives for personal responsibility.

Sound use of resources.

Education about consequences.

What do we mean by:

Regional solutions for regional differences—but within a state-wide strategic plan.

Access for all. A more rational system for *access for all* besides the emergency room.

Incentives for personal responsibility and wellness; incentives for communities and medical professionals—for example, incentives to help coordinate charitable and for-profit institutions. In general, work on aligning the explicit and implicit incentives.

Sound use of resources—for example, investments in prevention and public health; accountability, cost-effectiveness; maximizing funds.

Education about consequences of our current system. Make the business case for change. Create clear answers to the question, “What’s in it for me?”
